**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-18, 36-46 and 56-70, drawn to methods of increasing the sensitivity of stem cells to a chemoattractant by using HGF.

Group II, claims 19-35 and 71-74, drawn to methods of treating a disorder using HGF.

Group III, claims 47-55, drawn to stem cells and cell lines comprising nucleic acids encoding HGF.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The inventions of Groups I-III are all related to HGF. However, this concept cannot be considered as the "single general inventive concept" required by Rule 13 PCT because it is neither novel nor inventive. The prior art teaches uses of HGF as a colonization composition promoting engraftment (WO/2002/50263; IDS ref.), as a hematopoietic augmenting factor (EP 0550769; IDS ref.) and as a "mobilizer" of hematopoietic progenitors (US 5968501; IDS ref.). Furthermore, Pelled et al. (1999; IDS ref.) teach a method for

Art Unit: 1651

increasing stem cell sensitivity to a chemoattractant. Based on the prior art listed above, the unity of Groups I-III inventions is lacking.

The expression “special technical feature” refers to those features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. Thus, a feature found in the prior art cannot be considered to be a special technical feature.

A single general inventive concept must link the claims in the various categories, and in this connection the wording should be carefully noted. The link between a product and process of making it required for inventive unity is that the process must be “specially adapted for the manufacture of” the product. Similarly, an apparatus or means claimed must be “specifically designed for” carrying out the process of using the apparatus. In combinations of product and process claims, the emphasis is on, and the essence of the invention should primarily reside in, the product, whereas in combinations of apparatus and process claims, the emphasis is on, and the invention should primarily reside in, the process. See Examples in Chapter 10 of the International Search and Preliminary Examination Guidelines (which can be obtained from WIPO’s web site ([www.wipo.int/pct/en/texts/gdlines.htm](http://www.wipo.int/pct/en/texts/gdlines.htm)) and M.P.E.P. 1850, section III (A).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 1651

The election of an invention may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Taeyoon Kim whose telephone number is (571)272-9041. The examiner can normally be reached on 8:00 am - 4:00 pm ET (Mon-Thu).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Wityshyn can be reached on 571-272-0926. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
